-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

Applicant's election without traverse of claims 1 – 10 and 20 - 23 in the reply filed on 5/23/05 is acknowledged.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20 – 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Chang et al.

Chang et al., U.S. Patent No. 5,191,174, discloses a high-density circuit board. As shown in Figure 3, the subassembly 20 has a top surface with conductive through-holes that, as explained in column 5, line 26 can be used to connect to other conductive elements. The circuit board also includes a middle portion including a conductive layer 25, as described in column 4, line 22. The conductive through holes also extend to the bottom surface.

***Allowable Subject Matter***

Claims 1 – 10 are allowed.

Art Unit: 2822

The prior art including Chang et al. does not teach or suggest the recited electrically conductive layer disposed in the middle and extending to form a plurality of conductors that protrude horizontally for coupling to a main board.

Claim 23 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art does not teach the recited TSOP connection to a main board.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McMillan, U.S. Patent No. 6297458, discloses a printed circuit board.
